## LP Series

High Efficiency VHF-BIII Transmitters

ISDB-T TV Digital: 50 Watts RMS

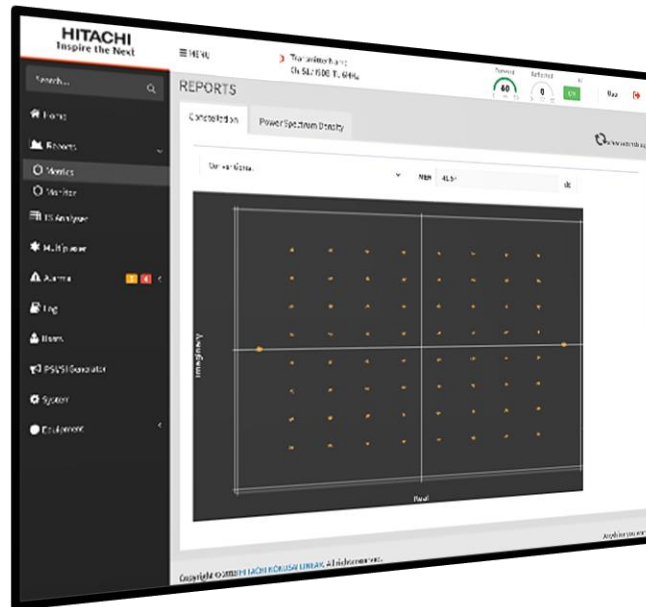

## LP Series

E-Compact Family of Low Power Broadband VHF-BIII Digital TV Transmitters features fully solid-state drivers, air-cooled and compatible in standard 19" cabinets.

Its compact design combines high power density per amplifier module and efficient energy consumption, embedded with adaptive non-linear pre-correction technology that allows to recover MER typical values if there are changes in the equipment output power.

## Highlights

- SoC (System on Chip) technology.
- Measurement tools through the WEB interface. In a graphical environment, it offers the visualization of measurements such as Intermodulation and MER, eliminating the need for high-cost measurement equipment.
- Real Time adaptive non-linear pre-correction and linear pre-correction.
- Built-in parameterizable BTS decompressor, compatible with other brands.
- Embedded remux, allows the signal adjustment according to the need for transmission.
- Onboard satellite receiver, with Free to Air, IRDETO<sup>1</sup>, CONAX<sup>1</sup>, BISS, VERIMATRIX<sup>1</sup> and NAGRAVISION<sup>1</sup> license options.
- Automatic fan speed control, resulting in low noise levels, energy savings and longer device life.
- "Easy Maintenance" concept offering, among others, Plug-In connection for Power Supplies and Power Modules.
- Up to two power supplies per transmitter, operating in "Share" mode, allows for different levels of power redundancy.

## Available resources

<p><b>SoC (System on Chip) Technology</b> The Hardware SoC integrates several elements of the system in a single chip, allowing software to be loaded with high processing power. This makes it a compact system with great processing power and high reliability.</p>	STANDARD
<p><b>Measurement tools</b> MER measurements, Intermodulation, Power, Temperature and many others. In the WEB interface, the visualization takes place in a graphical environment, allows the visualization of the constellation diagram and spectral density, among others, eliminating the use of high-cost measuring equipment.</p>	STANDARD
<p><b>Remote software update</b> It is possible to update the equipment software remotely, through the WEB interface.</p>	STANDARD
<p><b>Easy Maintenance concept</b> Power Supplies and Power Modules with plug-in connection, does not require the use of cables and wiring, allowing quick and safe replacement.</p>	STANDARD
<p><b>Embedded WEB Server</b> Remote access of the settings and management of the transmitter through the Ethernet<sup>2</sup> port is possible, using a PC or Smartphone browser, without the need to install drivers or applications.</p>	STANDARD
<p><b>Adaptive non-linear pre-correction and linear pre-correction</b> Imperceptible Automatic pre-correction applied due to changes in transmitter output power to recover MER values and intermodulation.</p>	STANDARD
<p><b>BTS Decompression</b> Parameterizable BTS decompressor, embedded in the Transmitter, eliminating the use of auxiliary devices in the system, thus permitting interoperability with other brands.</p>	STANDARD
<p><b>Embedded Remux</b> PID filtering, insertion of PSI/SI static tables, Virtual Channel configuration and TMCC parameterization.</p>	STANDARD
<p><b>Exciters Inputs / Outputs</b> <i>Inputs:</i> BTS/TS over IP, 2x ASI/310M, 1PPS, 10MHz e ANTENA GPS. <i>Outputs:</i> 2x ASI/310M, 1PPS, 10MHz and Ethernet<sup>2</sup> RJ45. <i>The BTS/TS over IP input can be converted to ASI and made available on the ASI/310M outputs without interfering with the modulating signal.</i></p>	STANDARD
<p><b>Passive Elements</b> Mask Filter, RF Probe after Mask Filter.</p>	STANDARD
<p><b>1200 W Power Supply</b> Power Supplies with plug-in type connection ("Easy Maintenance" concept), eliminates the use of cables and wiring and allows for quick and safe replacement. 01 power supply present in each transmitter.</p>	STANDARD
<p><b>Digital manuals in English.</b></p>	STANDARD
<p><b>ASI to IP convert</b> Bidirectional Ethernet<sup>2</sup> port for TSolP (input/output) streaming. The BTS/TS signal inserted into the ASI or TUNER inputs (SAT or UHF) can be made available on the Streaming port (TSolP), without interfering with the currently modulated signal. This functionality is optional, enabled through a software license.</p>	OPTIONAL
<p><b>TS Analyzer</b> Allows you to check TS information such as PIDs, Continuity Package Error, Program Name, Bit Rate, among others.</p>	OPTIONAL
<p><b>DC power</b> The Transmitters can have as an option Power Supplies with <math>\pm 48</math>VDC input, ideal for shared power systems in telecom shelters or solar energy backup systems.</p>	OPTIONAL
<p><b>GPS time base</b> High precision time base sync via GPS. High performance running on SFN (Single Frequency Network). Features an external GPS antenna and surge protector.</p>	OPTIONAL
<p><b>VHF-BIII / UHF Tuner (Terrestrial Reception) <sup>11</sup></b> ISDB-T VHF-BIII / UHF receiver and demodulator for terrestrial signal retransmission. It comes with a 5 or 7 pole mechanical tuning filter, depending on the conditions of the adjacent channels.</p>	OPTIONAL
<p><b>SAT Tuner (Satellite Reception)</b> L-Band DVB-S/S2 receiver compatible with C-band and Ku-band LNBs.</p>	OPTIONAL
<p><b>CAS Tuner (Satellite Reception with Conditional Access)</b> L-Band DVB-S/S2 receiver compatible with C-band and Ku-band LNB. It performs the decryption of up to 08 services simultaneously and visualization of up to 08 services on the display.</p>	OPTIONAL
<p><b>Electric Surge Protector for Sat Tuner and CAS Tuner</b> GTD (Gas Discharge Tube) Protector. Increased security for the equipment against electrical surges in the satellite signal reception line.</p>	OPTIONAL
<p><b>Decryption Licenses for CAS Tuner: IRDETO<sup>1</sup>, CONAX<sup>1</sup>, NAGRAVISION<sup>1</sup> and VERIMATRIX<sup>1</sup>, BISS-1 and BISS-E</b> Decryption licenses can be purchased individually or together, for new transmitters or for transmitters that are already in field operation. In some cases it is possible to enable licenses remotely.</p>	OPTIONAL
<p><b>Remote telemetry over GPRS</b> Transmitter remote monitoring using the GPRS cell phone network.</p>	OPTIONAL
<p><b>Redundant Power Supply</b> Each Transmitter has a compartment to accommodate up to 02 Power Supplies of 1,200W each, operates in "Share" mode when the 02 Supplies are present.</p>	OPTIONAL
<p><b>Manuals printed in English.</b></p>	OPTIONAL

## General features

Compatible in standard in 19" Rack;

Fully solid state;

Exciter and power amplifier integrated in the same equipment.

Air cooled;

Automatic restart in case of power failure;

Operates on SFN (Single Frequency Network) and MFN (Multiple Frequency Network);

Positively shifted center frequency of OFDM carriers of 1/7 MHz.

All equipment controlled and managed by firmware;

Access to settings and management of parameters via display interface on the front panel of the Exciter or remote via Ethernet<sup>2</sup> (WEB server or SNMP);

Alarm signaling LEDs present on the front panel;

Access the list of current or occurred alarms via display interface on the front panel of the Exciter or remotely via WEB interface;

VSWR and Overpower protection via hardware and software, with automatic power reduction;

Software protection against module temperature increase, with alarm signaling and power reduction;

Automatic fan rotation speed control;

Automatic quiescent bias current compensation of power transistors as a function of temperature;

Automatic and programmable input switching in hold on and hold off modes;

Power supply with PFC (Power Factor Correction) and soft starter with In-Rush limitation.

Environment temperature range	0°C (32°F) to + 45°C (113°F) +25°C (77°F) recommended
Environment humidity range	0 to 95 % non-condensing
Power amplifier cooling	Forced ambient air, front-to-rear flow through high-volume integral fans

## Multichannel Mount Option

The E-Compact Multichannel System is designed for ISDB-T Digital TV broadcast sharing. This system allows several stations to operate on different channels, sharing the same structure of the radiating system and electrical energy.

The Multichannel system consists of low power E-Compact family transmitters of up to 50 Watts after the combiner.

### Manifold Combiner

Compact system, offers a better optimization of the physical space.

### Front signal connection interfaces

All signal input and output interfaces are located on the equipment's front panel, for easier installation access.

### “Easy Maintenance” Concept

Power Supplies and Amplifier Module with plug-in connection, removable through the equipment front panel.

### Air flow direction options for refrigeration:

Front-Rear  
Rear-Front

### Notes:

- <sup>1</sup> Module with PCMCIA CAM slot (Irdeto, Conax, Nagravision and Verimatrix systems), SMARTCARD and CAM not included.
- <sup>2</sup> Ethernet is a trademark of Xerox Corporation.
- <sup>3</sup> Measurements in channel and optimized environment, may vary according to operating frequency and MER.
- <sup>4</sup> Critical Mask is the standard for E-Compact transmitters. For Multichannel mounting type, the mask will depend on the filter or combination system.
- <sup>5</sup> Rated power up to 2500 meters (8200 ft). Above 2500 meters (8200 ft), consult factory.
- <sup>7</sup> Not available for Multi-Channel Mounting option.
